

**Amendments to the Specification:**

Please amend the Specification by inserting the following new heading after the title:

-- Cross Reference to Related Application--

and add the following new paragraph immediately following the above-noted new heading:

-- This is a continuation of co-pending application number 10/004,434, filed on October 31, 2001, which is hereby incorporated by reference herein.

Please replace the Abstract with the following new Abstract:

An image forming apparatus has a movable print device. A sensed device with indicia capable of being sensed is positioned adjacent to the movable print device. At least first and second indicia sensors are carried by the movable print device in spaced relation to one another.
